Bhuvann Vinodh Ram

Graduate Data Analyst

Stamp 1G holder: eligible to work full-time in Ireland without a work permit

PROFILE

MSc AI for Medicine graduate (UCD) who turns messy data into clear answers: scraping and cleaning data, statistical and survival analysis, and dashboards and reports written for non-technical readers. Python (pandas, seaborn), SQL, R and Tableau. Currently a Trust and Safety Associate at Accenture, Dublin, classifying content against detailed policy.

EDUCATION

MSc Artificial Intelligence for Medicine and Medical Research — 2024 – 2025
University College Dublin — GPA 3.37 / 4.2

BTech Computer Science and Medical Engineering — 2020 – 2024
Sri Ramachandra Institute of Higher Education and Research, Chennai — CGPA 3.18 / 4

TECHNICAL SKILLS

Analysis	Python (pandas, NumPy, SciPy), SQL, R; statistics, hypothesis testing, survival analysis (Kaplan–Meier, log-rank)
Visualisation	Tableau, matplotlib, seaborn, Plotly, interactive web dashboards
Data preparation	Cleaning, validation, web scraping (Requests, Beautiful Soup), feature engineering
Modelling	Regression, classification, clustering, ensembles, model evaluation
Tools	Jupyter, Git, GitHub Actions

EXPERIENCE

Trust and Safety Associate — Mar 2026 – Present
Accenture — Dublin, Ireland

- Evaluate, classify and moderate user-generated content against client platform policies to keep online communities safe and compliant.

Research Intern — Apr 2025 – Sep 2025
University College Dublin — Dublin, Ireland

- Clustered TCGA colon adenocarcinoma patients from integrated multi-omics data (K-Means, HDBSCAN) and evaluated clusters with silhouette scores.
- Tested clinical relevance with Kaplan–Meier curves and log-rank tests, and reported which genes drove the groups using differential expression and SHAP.

Project Intern — Jan 2024 – Jun 2024
Centre for Toxicology and Development, SRIHER — Chennai, India

- Converted zebrafish behaviour videos into tracking data and computed speed and velocity measures across tanks and layers.
- Produced charts and written reports summarising behavioural trends for the research team.

Research Intern — Dec 2022 – Feb 2023
IIITDM Kancheepuram — Chennai, India

- Developed and compared CNN breast cancer classifiers using pre-trained VGG16, ResNet, MobileNet and EfficientNet models.

Intern — Feb 2022 – Apr 2022
Smartail Pvt. Ltd. — Chennai, India

- Containerised web applications with Docker and deployed them through GitLab CI/CD pipelines.
- Worked on image processing with Detectron2, including hyperparameter tuning.

PROJECTS

Conflict Risk Monitor 2026
Python · pandas · scikit-learn · GitHub Actions · JavaScript Live demo · GitHub

- Dashboard of country-level risk of armed-conflict violence: KPI tiles, trend charts, searchable table and country drill-downs, built from UCDP and World Bank open data.
- Compared a persistence baseline, logistic regression and gradient boosting on a time-based split; on 2022–26 test data the chosen model reached ROC AUC 0.989 against 0.981 for the baseline.

Retail sales register analysis 2025
Requests · Beautiful Soup · pandas GitHub

- Scraped multi-page sales records, cleaned dates, currencies and missing values, and analysed revenue, profit and customer behaviour by location and age group.

Student engagement analysis (VLE) 2025
scikit-learn · ensembles GitHub

- Voting ensembles (random forest, logistic regression, gradient boosting, SVM) on virtual learning environment data, compared across feature-selection settings.

Ovarian cancer survival prediction (HGSOC) 2025
XGBoost · SHAP · TCGA GitHub

- XGBoost on TCGA clinical and mutation data with SHAP explanations; found and removed follow-up variables that leaked the outcome, then reran the notebook end to end in GitHub Actions: test accuracy 0.78, ROC AUC 0.91.

Wimbledon Championship dashboard 2021
Tableau GitHub

- Interactive Tableau dashboard of Wimbledon results and player statistics.

OTHER PROJECTS

- **Tamil Thedal (தமிழ் தேடல்)** (JavaScript · OpenCV.js · Tesseract.js · Python ETL, 2026): Search engine over 1,549 Tamil verses with filters by work, author, category and 17 themes, plus grammar lessons and a history timeline.
- **RNA-seq analysis of HER2 breast cancer** (R · DESeq2 · clusterProfiler, 2024): Differential expression, pathway enrichment and survival predictors in R to study how HER2 amplification changes gene expression.
- **ECG heartbeat classification** (1D CNN · Keras, 2025): 1D CNN classifying MIT-BIH heartbeats into five classes: 96.01% test accuracy on 21,892 held-out beats, reproduced by an automated GitHub Actions rerun.
- **Emotion classification from tweets** (BiLSTM · TensorFlow · Gradio, 2025): Dual-input BiLSTM combining word embeddings with sentiment polarity: 90.63% test accuracy, served as a Gradio app.

AWARDS AND ACTIVITIES

- UCD Innovation Challenge 2024: Innovation Spark Award
- NASA Space Apps Challenge 2024: built a climate storytelling website with a team
- UCD Advantage Award
- First place, Tamil poetry competition (Agal Tamil Club)
- Second place, Palaestra intramural volleyball tournament
